WORK HISTORY

Full-Stack Developer, Sept 2018 - Apr 2019

GroupBy Inc., Austin, TX

- Worked with other developers on maintaining the company's projects using a variety of web-based technologies, frameworks, and modern software development processes such as Agile and Test Driven Development
- Helped scale up a product by refactoring existing code and clearing up poor and unused database index clutter
- Updated frontend features for a product in order to improve productivity in the workplace.
- Refactored API endpoints to follow a more modern software architectural pattern.
- **Technologies used:** HTML5, CSS3, Javascript, Ruby, Typescript, SQL, Node.js, Express.js, Angular 1.x, Angular 2+ (briefly), SCSS, Webpack, Docker, PostgreSQL

Full-Stack Developer (contract), Aug 2016 - Mar 2017

Perficientur Sense2Action, McAllen, TX

- Developed websites and web-based applications for various clients and businesses in a scrum-based environment.
- Developed Android applications almost entirely in Javascript using frameworks such as Ionic and Angular 1.x.
- Helped design wireframes, plan the application logic, and create tasks for each project that the team took on
- **Technologies used:** HTML5, CSS3, Javascript, PHP, SQL, Bootstrap, Node.js, Express.js, Angular 1.x, Ionic, Laravel, MySQL, PostgreSQL, MongoDB

Systems Analyst Office Assistant, Jun 2014 - Aug 2015

University of Texas Rio Grande Valley, Edinburg, TX

- Assisted a Systems Analyst with clerical duties such as unlocking the labs for the students and aiding engineering professors with technical issues
- Transported hardware (and occasionally software) supplies across campus

HIGHEST EDUCATION

Bachelor's degree in Computer Science, August 2016

The University of Texas Rio Grande Valley, Edinburg, TX
